

In the Claims:

- 1.(currently amended) A water soluble container containing a concentrate composition comprising:
  - (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof;
  - (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt.;
  - (c) optionally, but desirably at least one alkanolamine; and
  - (d) optionally, up to about 10% wt. of one or more conventional additives selected from coloring agents, fragrances and fragrance solubilizers, further surfactants, pH adjusting agents and pH buffers, optical brighteners, opacifying agents, hydrotropes, anti-oxidants, and preservatives;  
wherein said composition contains no more than 12.5%wt. 1%wt. water.
- 2.(currently amended) A water soluble container according to claim 1 containing a concentrate composition ~~comprising~~:
  - (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof;
  - (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt.;
  - (c) optionally, but desirably at least one alkanolamine; and
  - (d) optionally, up to about 10% wt. of one or more conventional additives selected from coloring agents, fragrances and fragrance solubilizers, further surfactants, pH adjusting agents and pH buffers, optical brighteners, opacifying agents, hydrotropes, anti-oxidants, and preservatives;  
wherein said composition contains in excess of 7.5%wt. water, but not more than about 12.5%wt. water no more than 5.5%wt. water.

3.(currently amended) A water soluble container according to claim 1 containing a concentrate composition ~~comprising~~:

- (a) ~~at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof;~~
- (b) ~~at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt.;~~
- (c) ~~optionally, but desirably at least one alkanolamine; and~~
- (d) ~~optionally, up to about 10% wt. of one or more conventional additives selected from coloring agents, fragrances and fragrance solubilizers, further surfactants, pH adjusting agents and pH buffers, optical brighteners, opacifying agents, hydrotropes, anti-oxidants, and preservatives;~~
- ~~wherein said composition which contains no more than 5.5%wt. in excess of 7.5%wt. water, but not more than about 12.5%wt. water.~~

4.(currently amended) A water soluble container containing a concentrate composition according to claim 1 ~~any of claims 1—3~~ wherein the concentrate composition comprises (c) at least one alkanolamine.

5.(currently amended) A water soluble container containing a concentrate composition according to claim 1 ~~any of claims 1—4~~ wherein the concentrate composition exhibits a flash point of at least 105°F.

6.(currently amended) A water soluble container containing a concentrate composition according to claim 1 ~~any of claims 1—5~~ wherein the (b) the at least one organic solvent having a solubility in water of at least 4%wt. is present in an amount of at least 70%wt 75%wt.

7.(currently amended) A water soluble container containing a concentrate composition according to claim 1 ~~any of claims 1—4~~ wherein the concentrate composition comprises:

(b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt. which comprises propylene glycol n-butyl ether and propylene glycol methyl ether and optionally comprises a C<sub>1</sub>-C<sub>6</sub> glycol, or a C<sub>1</sub>-C<sub>6</sub> monohydric alcohol.

8.(original) A water soluble container containing a concentrate composition according to claim 7 wherein the concentrate composition comprises (b) at least 70%wt. of at least one organic solvent having a solubility in water of at least 4%wt. which comprises propylene glycol n-butyl ether, propylene glycol methyl ether and a C<sub>1</sub>-C<sub>6</sub> monohydric alcohol.

9.(currently amended) A water soluble container containing a concentrate composition according to claim 1 ~~any of claims 1-8~~ wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof comprises a C<sub>10</sub>-C<sub>14</sub>alkyl sulfate surfactant, a C<sub>10</sub>-C<sub>14</sub>alkyl ether sulfate surfactant and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.

10.(original) A water soluble container containing a concentrate composition according to claim 9 wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof consists essentially of a C<sub>10</sub>-C<sub>14</sub>alkyl sulfate surfactant, a C<sub>10</sub>-C<sub>14</sub>alkyl ether sulfate surfactant and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.

11.(currently amended) A water soluble container containing a concentrate composition according to claim 1 ~~any of claims 1-8~~ wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof comprises at least one nonionic surfactant based on an ethoxy/propoxy block copolymer, further in conjunction with at least one nonionic surfactant

based on ethoxylated fatty alcohols, and wherein the concentrate composition further includes as a further surfactant an alkoxyated quaternary ammonium compound.

12.(currently amended) A water soluble container containing a concentrate composition according to claim 1 ~~any of claims 1—8~~ wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof consists essentially of at least one nonionic surfactant based on an ethoxy/propoxy block copolymer, further in conjunction with at least one nonionic surfactant based on ethoxylated fatty alcohols,  
and wherein the concentrate composition further includes as a further surfactant an alkoxyated quaternary ammonium compound.

13. (currently amended) The water soluble container according to claim 1 ~~any of claims 1—12~~ which comprises a thermoformed or injection molded water soluble polymer.

14.(original) The water soluble container according to claim 13 wherein the water soluble polymer is poly(vinyl alcohol).

15.(original) A process for treating a surface, particularly a hard surface especially one or more selected from polished metal surfaces, glass and mirrors in need of cleaning, comprising the process steps of:

placing a water soluble container containing a concentrate composition according to claim 1 ~~any of the preceding claims~~ into a larger quantity of water;  
allowing the water soluble container to dissolve in the water to form a cleaning solution;  
and applying an effective amount of the solution to the surface in need of treatment.

16.(new) A water soluble container containing a concentrate composition according to claim 3 wherein the concentrate composition comprises (c) at least one alkanolamine.

17.(new) A water soluble container containing a concentrate composition according to claim 3 wherein the concentrate composition exhibits a flash point of at least 105°F.

18.(new) A water soluble container containing a concentrate composition according to claim 3 wherein the (b) the at least one organic solvent having a solubility in water of at least 4%wt. is present in an amount of at least 75%wt.

19.(new) A water soluble container containing a concentrate composition according to claim 3 wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof comprises a C<sub>10</sub>-C<sub>14</sub>alkyl sulfate surfactant, a C<sub>10</sub>-C<sub>14</sub>alkyl ether sulfate surfactant and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.

20.(new) A water soluble container containing a concentrate composition according to claim 19 wherein the (a) at least one surfactant selected from non-ionic surfactants, anionic surfactants, and mixtures thereof consists essentially of a C<sub>10</sub>-C<sub>14</sub>alkyl sulfate surfactant, a C<sub>10</sub>-C<sub>14</sub>alkyl ether sulfate surfactant and mixture thereof, further in conjunction with one or more nonionic alkylpolyglycoside surfactants.
